REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art does not teach the combination in claim 2 of circular plates and fins in combination with a coupling assembly including a plurality of symmetrically spaced apertures in the ring of each fin, the apertures...located radially exterior of the rings of the plates. There is no disclosure of a coupling assembly in Ooi. In Gfroerer (EP '332), the fins 5 are not circular but rather square (Fig.5), in contrast to the circular stator laminations/plates 6. A polygonal shape for the fins 5 is preferred so that the coupling flange 9 and cover 11 are centered precisely (c.3, lines 8-23). This teaches away from applicant's combination of circular fins and circular plates. In Herron, couplers (bolts) 28 pass through apertures in plates 11 and fins 12 (Figs.2&3); therefore, the apertures are not located radially exterior of the rings of the plates 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Burton S. Mullins whose telephone number is 571-272-2029.
